

CVP water. Section 3409 directs the Secretary to complete a PEIS to analyze the direct and indirect impacts and benefits of implementing the CVPIA.

On February 25, 1993, the Secretary approved a memorandum signifying roles of the Bureau of Reclamation (Reclamation) and the Service in regards to implementing the CVPIA. The Service's role was defined as having " * * * primary responsibility for decisions on biological resource issues; for studies on fish and wildlife, their populations and habitat requirements; for fishery restoration program direction; and for the planning, design, and decisions on the administration of fish and wildlife facilities." Because of this language and other specifications in the CVPIA, the Service began implementing, in an interim manner and jointly with Reclamation, provisions of the CVPIA which met the definition of its responsibility. It also began participating in efforts to complete the PEIS for implementing the CVPIA, supporting complete environmental analysis of long-term program implementation efforts for both Reclamation and the Service.

Since 1993, the Service has participated in efforts leading to release of the Draft PEIS for the CVPIA in 1997. Efforts to date suggest the Service was more a de-facto co-lead agency than cooperating agency. Service efforts included such things as attending public and agency meetings, providing responses from the Department of the Interior perspective on fish and wildlife issues; participating in decisions regarding assumptions, model usage, and analysis in the PEIS; and participating in preparation of documentation. Additionally, possible programmatic-level actions that the Service might take to implement the CVPIA were discussed and evaluated during scoping processes associated with completion of the draft NEPA document.
